

ADJOVI LEMBILA AKPAKI

DATA SCIENCE | ARTIFICIAL INTELLIGENCE | ANALYTICS | RISK & OPERATIONS

Denver Metro, CO | 402-906-2907 | adjovig38@gmail.com | U.S. Citizen | French & English | Open to Relocation

PROFESSIONAL PROFILE

Data science and analytics professional combining graduate-level artificial intelligence training with hands-on experience in risk operations, trust & safety, fraud/compliance, finance, billing, and high-volume business workflows. Builds reproducible analytical solutions with Python, SQL, machine learning, Generative AI, Retrieval-Augmented Generation (RAG), model evaluation, data visualization, and AI safety concepts. Experienced translating technical results into practical recommendations for business and operational stakeholders.

TECHNICAL EXPERTISE

- Programming & Data: Python, SQL, R, pandas, NumPy, Jupyter Notebook, data cleaning, feature engineering, data validation, API integration
- Machine Learning: scikit-learn, Logistic Regression, Decision Trees, Random Forest, regression, classification, PCA, recommender systems, cross-validation
- AI & Generative AI: OpenAI API, prompt engineering, RAG, TF-IDF retrieval, cosine similarity, supervised fine-tuning workflows, Stable Diffusion API, LLM evaluation
- AI Safety & MLOps: Microsoft Azure AI Content Safety, Prompt Shields concepts, groundedness evaluation, MLflow experiment tracking, latency/token observability
- Deep Learning & NLP: TensorFlow, Keras, PyTorch, CNNs, sentiment analysis, natural-language processing
- Analytics & BI: Power BI, Tableau, Matplotlib, Excel PivotTables, XLOOKUP/VLOOKUP, Power Query, dashboards, KPI reporting
- Operations: risk analysis, fraud analysis, compliance, AP/AR, reconciliation, documentation, process improvement, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Walmart — Risk Operations Analyst | Remote | 2026

- Analyzed approximately 89-150 seller accounts per day using structured account data, policy criteria, and documented decision workflows.
- Identified trends, exceptions, and process-improvement opportunities while meeting quality and productivity expectations.
- Coordinated with cross-functional teams to resolve operational issues and maintained accurate case documentation and reporting.

Accenture (LinkedIn) — Trust & Safety / Operations Analyst | Omaha, NE | Jun 2022 - Jun 2025

- Analyzed approximately 200-500 accounts or workflow items per day in a high-volume trust & safety environment.
- Built Excel trackers and reporting dashboards that improved visibility into workflow status, operational performance, and KPIs.
- Investigated complex issues, documented findings, resolved escalations, and collaborated across business teams to improve process consistency.

Fiserv — Billing & Financial Operations / AP & AR Support | Omaha, NE | Aug 2023 - Jun 2024

- Supported billing, invoice processing, reconciliation, approvals, payment tracking, and financial documentation under internal controls.
- Performed data validation and discrepancy analysis to strengthen reporting accuracy and month-end readiness.
- Partnered with internal teams and vendors to resolve billing issues and maintain organized, audit-ready records.

Rentokil North America — Compliance & Fraud Analyst | Omaha, NE | Feb 2023 - Aug 2023

- Reviewed operational and financial records for compliance, accuracy, completeness, and potential fraud or risk indicators.
- Prepared analytical documentation supporting reporting, audit readiness, and operational planning.
- Identified data-quality issues and contributed to process improvements that strengthened reporting consistency.

Check Into Cash — Loan Processor | Omaha, NE | Jan 2019 - May 2022

- Processed loan applications and verified customer identity, financial information, eligibility requirements, and supporting documentation.
- Maintained confidential customer and transaction records while following company procedures and compliance requirements.
- Supported payment inquiries, cash handling, transaction processing, and daily operational reporting.

SELECTED DATA SCIENCE & AI PROJECTS

Generative AI Engineering, RAG & Azure AI Safety — Developed OpenAI API prompt workflows, a transparent RAG chatbot with TF-IDF retrieval and cosine similarity, supervised fine-tuning workflows, MLflow GenAI observability, Stable Diffusion API experiments, and Azure AI Content Safety research covering prompt protection and groundedness.

Employee Attrition Prediction — Compared Logistic Regression, Decision Tree, and Random Forest models on IBM HR Analytics data; evaluated precision, recall, F1, ROC-AUC, feature importance, overtime risk, fairness, privacy, and human-centered HR decision support.

Credit Card Fraud Detection — Analyzed 339,607 transactions with severe class imbalance; engineered time, age, and geographic-distance features and compared Logistic Regression and Random Forest using precision, recall, F1, ROC-AUC, PR-AUC, and confusion matrices.

MNIST Handwritten Digit CNN — Built and evaluated a TensorFlow/Keras convolutional neural network for image classification and documented the end-to-end deep-learning workflow.

Recommendation System — Implemented item-based collaborative filtering with MovieLens ratings and cosine similarity to generate movie recommendations.

Netflix Mature Content Prediction — Completed exploratory analysis, feature preparation, classification modeling, evaluation, and responsible-use discussion for streaming-content metadata.

IMDB Sentiment Analysis — Applied natural-language processing and sentiment analysis to movie-review text, with documented preprocessing and interpretation.

PCA & Feature Selection — Used principal component analysis and feature-selection techniques to reduce dimensionality and evaluate multivariate structure.

EDUCATION

Arizona State University — Master of Science, Construction Management | *Expected Aug 2027*

Bellevue University — Master of Science, Data Science with Generative AI | *Expected Aug 2026*

University of Nebraska at Omaha — Bachelor of Science, Business Administration | *Dec 2024*

Metropolitan Community College — Associate of Applied Science, Accounting (Honors)

CERTIFICATIONS & PROFESSIONAL TRAINING

- Planning & Control with Oracle Primavera PPM Professional
- Oracle Primavera P6 - Project Setup and Basic Management
- Advanced Scheduling and Project Optimization in Primavera P6
- CompTIA CySA+
- Google Cloud Fundamentals
- Financial Markets
- HR Data Management Systems

PROFESSIONAL STRENGTHS

Business-focused data storytelling | Responsible AI | Technical documentation | Reproducible analysis | Stakeholder communication | Cross-functional collaboration | Process improvement | Data quality and integrity
